

Industrial Computing for the Railroad Industry

CCS understands the harsh environments of the railroad industry. Dust, grease, and extreme temperatures must be expected not only in rail yards, but also in maintenance shops. When deploying technology on shop floors, CCS knows how to protect computer equipment to maximize its usable life.

Choosing CCS as your turnkey computing solutions provider ensures that you will receive a **durable** solution with a **lower total cost of ownership** that is **easy to use**.

Kiosks and Enclosures

- CCS is an ISO 9001:2000 certified company that manufactures NEMA-rated (12, 4, 4X) steel enclosures.
- Available in a variety of shapes and sizes, all units can be fully integrated so that they are ready to "plug and play."
- Enclosures protect computers and monitors so that equipment lasts longer and is more user-friendly on the shop floor.

Industrial Computers

- When a standard desktop PC will not suffice, CCS offers several industrial configurations as well as custom design services and manufacturing.
- CCS provides revision control to ensure long lifecycle systems.

Partnering with Buckeye Mountain Wireless Solutions

- To better serve the railroad industry, CCS partners with Buckeye Mountain Wireless Solutions to provide complete turnkey systems.
- Buckeye Mountain designs, develops, deploys, and supports software and mobile and wireless solutions for rail and transportation clients.

Company Profile

Founded in 1981, Comprehensive Computer Solutions is based in Christiansburg, VA. CCS-Inc. provides industrial computer systems as well as NEMA-rated computer and printer enclosures. Qualtrax, a wholly-owned subsidiary, offers compliance software solutions. CCS' products and services cater especially to clients operating within harsh environments and/or regulated industries including manufacturing, food and beverage, pharmaceutical, energy, and telecommunications.

CCS-Inc's core competency lies in its service. The engineering staff is skilled at working with customers and OEMs to act as an extension of their own design teams. CCS is large enough to provide volume and competitive prices, but small enough to offer custom development and personalized support for each project.

Consulting & Design

- Evaluate existing systems and project plans
- Propose manufacturer-neutral custom solutions

Maintenance

- Manage product lifecycle and upgrade parts, images, etc.
- Offer extended warranty and service packages

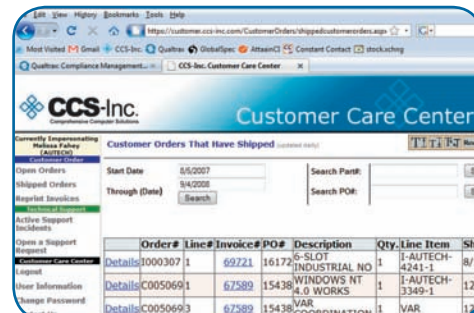

Engineering & Production

- Offer mechanical, electrical, and computer engineering expertise
- Integrate hardware, software, enclosures, and networking equipment to meet customer specifications

Customer Care

- Provide visibility of pricing and shipping using online tools
- Support customers via telephone, email, and on-site visits

Testing & Documentation

- Understand certification requirements and offer a variety of testing services
- Maintain thorough records of export and regulatory compliance (CE, UL, RoHS, etc.)

Branding & Packaging

- Prepare products for shipping and end use
- Productize solutions for OEM customers (custom logos, paint, etc.)

Installation

- Deploy systems on location
- Monitor initial operations
